# RG3 - Redgate Wealth Bold strategy

### Investment strategy

The portfolio invests in bonds, stocks, and in financial instruments with similar risk-level. The long-term allocation between equity and bond-risk financial instruments is 70% and 30%, respectively. In the short term, the portfolio may deviate significantly from this asset allocation, but the share of equities and similar risk instruments never exceeds 85%. The recommended minimum investment horizon for the portfolio is more than five years. Portfolio investments may be made globally, and in any sector and region that is not internationally sanctioned. Historically, the nominal average return (10 years) of a passive portfolio with comparable asset allocation has been approximately 9% per year. The portfolio is actively managed, takes only long positions, and does not use financial leverage. The base currency of the portfolio is the euro (EUR), and currency risk is actively managed within the portfolio.

#### Risk level

#### Portfolio manager

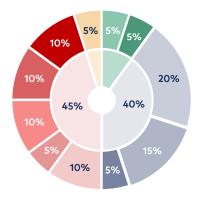

The portfolio has been compiled by Peeter Koppel, the Chief Investment Officer at Redgate Wealth.

Peeter possesses over 20 years of experience in investment management, serving as a broker, investment manager, and private banking strategist.

## RG3 - Redgate Wealth **Bold strategy**

## Important information!

The portfolio has been compiled for contractual clients of Redgate Capital's investment advisory services, where the suitability of the strategy has been assessed beforehand for the client. The selection of investment recommendations for the portfolio is based on the principle that each individual instrument should have a sufficiently simple structure and be suitable for retail clients (i.e., individual investors). However, without a suitability assessment, the portfolio may not necessarilyalign with your investment profile.

Before making an investment decision, please carefully review the publicly available information about the instruments included in the portfolio that is described in the investment strategy (relevant information opens by clicking on the instrument's name) and, the general terms and conditions of Redgate Capital's investment services, the specific terms of dependent investment advisory services, and the regulations of AS Redgate Capital published on the Redgate Wealth website at www.redgatewealth.eu, including an overview of the risks associated with investment (https://redgatewealth.eu/en/our-services/our-internal-rules/).

The past performance of the portfolio or its historical activity does not imply a promise or indicator of the portfolio's future performance or achievement of its objectives in subsequent periods.

The risk level ranging from 1-7 serves as a guideline for the risk level of this investment strategy compared to other investment strategies. Risk level 1 indicates the lowest risk, while risk level 7 indicates the highest risk. The risk levelindicates how likely it may result in financial losses due to movements in financial markets, while using the investment strategy.
